

Card-based solutions – secure and flexible digital interactions

BANKING

The importance of using chip cards for getting access to banking services is gaining more and more in importance. This goes in line with increasing demands for security and data protection. We are one of the leading suppliers for contact and contactless payment solutions also counting on our own operating system.

- Debit/Credit Cards
- Dual Interface Cards
- EMV Transactions

LOYALTY

For many companies loyalty cards are an important marketing tool used in different applications to positively affect customer loyalty and buying behavior. E.g. customers receive rewards while participating in a retail business bonus program. WINTER AG provides all kind of cards with or without magnetic stripe or chip and with special optical effects and haptics.

- Customer Cards
- Membership Cards
- Gift Cards
- Key Cards

HEALTH

Cost pressure and the need for more transparency in existing healthcare systems call for new and secure means of communication. One means to improve efficiency is the implementation of smart card-enabled e-health networks. Winter provides comprehensive products and services to healthcare providers and health insurers.
